Validation of Changes:

1. Name Change Validation:

- The change from "Google" to "Alphabet" aligns with the restructuring of Google into Alphabet Inc., which was officially announced on October 2, 2015. This change can be validated through official announcements, regulatory filings, and reputable news sources.

2. Address Change Validation:

- The change in address from "CA" to "California" and the addition of "United States of America" to the address suggest a modification. However, the rest of the address remains the same. Validation would require checking if the address change is reported in credible sources or if the locations are near each other and could be considered the same address with minor formatting differences.
